

Assembling your bin

Parts Identification

- a. Legs x 4
- b. Dowels x 2
- c. Elbows x 2
- d. Centre Shaft assembly
- e. Drum Joining assembly x 16 (screws, washers and nuts)

Stage 1

Remove nuts from Centre Shaft assembly (d) and fit elbows (c) with indent facing out. Refit nuts and tighten each end using two spanners turning in opposite directions until nuts lock.

Stage 2

Locate Centre Shaft assembly in one of the bearing grooves of one drum.

Stage 3

Assemble drum by placing second half on top of first half, making sure to locate the bearing grooves. Join halves together using Drum Joining assembly (e). Fit 16 screws with washers in holes before adding and tightening nuts.

Stage 4

Assemble both sets of legs (a) together by fitting dowel into short part of the leg and pressing together. Repeat for second set.

Stage 5

Fit one leg set to elbows by pressing "U" together to allow entry to elbows.

Stage 6

Fit second leg set to elbows by same method.

Stage 7

Lift Tumbleweed Compost maker onto stand

Easy Tumble Action

For an easy tumbling action LIFT and PUSH at the same time.
